Automated testing for HIV and Hepatitis B and C Virus
Reliable viral load monitoring of blood borne viruses

AltoStar® HIV RT-PCR Kit 1.5
- Detection and quantification of human immunodeficiency virus type 1 (HIV-1) specific RNA
- Validated for HIV-1 groups M, N and O
- Dual target detection: with amplification of separate regions of HIV-1 genome
- Targets detected: Target 1 = integrase (INT), Target 2 = protease (PRO)
- Quantification Standards calibrated against the 4th WHO International Standard for HIV-1 RNA (NIBSC code: 16/194; subtype B)

AltoStar® HCV RT-PCR Kit 1.5
- Detection and quantification of hepatitis C virus (HCV) specific RNA
- Validated for genotypes 1 to 6
- Quantification Standards calibrated against the 5th WHO International Standard for HCV NAT (NIBSC code: 14/150)

AltoStar® HBV PCR Kit 1.5
- Detection and quantification of hepatitis B virus (HBV) specific DNA
- Validated for genotypes A to H
- Quantification Standards calibrated against the 4th WHO International Standard for HBV DNA for Nucleic Acid Amplification Techniques (NIBSC code: 10/266)
AltoStar® portfolio
Viral load monitoring on high performance level

For use with the automated AltoStar® Workflow
Efficiency, reliability and process safety

Assay principle
Real-time PCR-based test kits
Ready-to-use reagents

PCR time
2 - 2.5 hours

Purification
AltoStar® Purification Kit 1.5
One chemistry for DNA and RNA extraction

Throughput
Up to 48 analyses per run

IVD compliance
CE-IVD marked in vitro diagnostic test

Product | Detection of | Rxns | GTIN | Order No. |
