FlexStar®
Quick and flexible ready-to-use PCR solution

Parallel detection of multiple pathogens
Simultaneous identification of different viral and bacterial targets

Less time – more results
Optimized PCR design for up to 96 results per PCR run in just 1h

Universal reagent
One single Amplification Mix to combine with different Detection Mixes

Flexible application
For use with AltoStar® Automation System AM16 or other workflows and real-time PCR cyclers

Upcoming features
Barcoded components for full traceability
Fully processed by AltoStar® Automation System AM16
More FlexStar® panels planned, e.g. Gastrointestinal, STD, and Fever
## Modular product design

Free combination of any FlexStar® (RT-)PCR Detection Mix 1.5 with the FlexStar® (RT-)PCR Amplification Mix 1.5

### FlexStar® respiratory panel
